T10-CH4-23 TOC-10 Series Gas Detector For CH4

UK Design and Manufacture

TOC-10 Series gas detectors were designed by our clients after their in-field experiences using conventional domestic gas detectors. Our clients wanted IGD's reputation for quality and reliability in industrial environments but in a detector built for a domestic environment. Building on the deficiencies our clients encountered TOC-10 sets the standard for this class of gas detector. TOC-10 finds applications in domestic gas safety but also in marine applications, commercial kitchens, schools, colleges and many more. All models have their own internal alarm sounders and clear visual alarm LED's. Models are then available depending on power source and required output interfaces. A pre-wired version is also available allowing you to plug and go straight out of the box.

Can be surface mounted using external mounting feet Possible to first fit during building work

Front mounted detector has unique splash guard and dust filter

IP Rated seals fitted between the front and rear housing

Clear Visual Alarms

Sensor housing is sealed from the electronics housing blocking flammable gas

Standard 2 Gang Fixing Allowing Flush Mounting Using Standard Patress During Building

20mm Cable Entry Knockouts Centred to Allow Easy Drilling For Smaller Entry Holes

All Models have a 'link' function. Once linked if one TOC-10 goes into alarm then all linked units go into alarm

EC Declaration of Conformity

Issuers name and address:

Oliver IGD Limited of
Triton Hous,
Crosby Street,
Stockport,
SK2 6TS
England

Declares that the product listed as:

TOC-10-CH4-23

Flammable point gas detector for use in 'safe' non-zoned areas only, stand alone operation.

Is in conformity with the provisions of the following European Directive(s) when installed, operated, serviced and maintained in accordance with the installation and operating instructions contained in the product documentation.

2004/108/EC EMC Directive

And that the standards and/or technical specifications referenced below have been applied or considered.

- | | |
|----------------------|--|
| EN 50194-1:2009 | - Electrical apparatus for the detection of combustible gases in domestic premises. Test Methods and performance requirements. |
| EN 50270:2015 | - Electromagnetic compatibility. Electrical apparatus for the detection and measurement of combustible gases, toxic gases or Oxygen. |
| EN 60335-1:2002 | - Household and similar electrical appliances. Safety. General Requirements |
| EN 60529 | - Ingress Protection Rating |
| EN 61000-6-2: 2005 | - EMC Generic standards. Immunity for industrial environments |
| EN 61000-6-4: 2007 | - EMC Generic standards. Emission standard for industrial environments |
| EN 61000-3-2/A2:2009 | - EMC Limits. Limits for harmonic current emissions (equipment input current ≤ 16 A per phase) |
| EN 61000-3-3: 2008 | - EMC Limits. Limitation of voltage changes, voltage fluctuations and flicker in public low-voltage supply systems, for equipment with rated current ≤ 16 A per phase |
| Technical File | - T10-TF9 Technical construction File |

Installation requirements

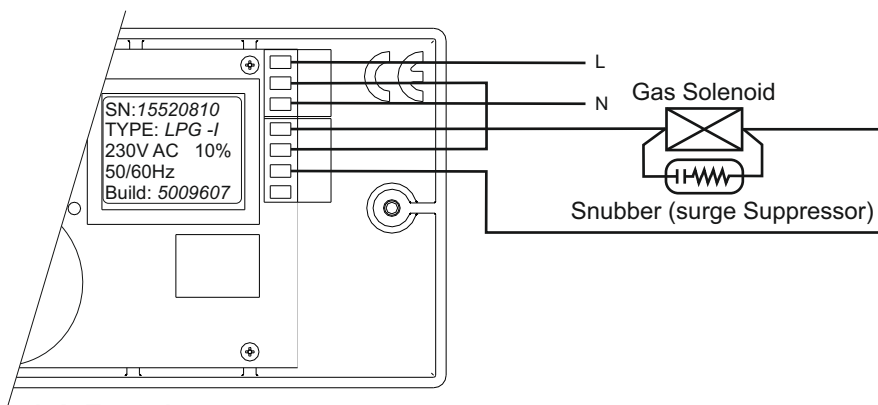

! Warning !

Installation of this device to the mains power supply should only be made by a competent person. The unit is supplied pre-calibrated but should be checked regularly, at least monthly using the test feature. Clean only with a damp cloth do not use any cleaning products

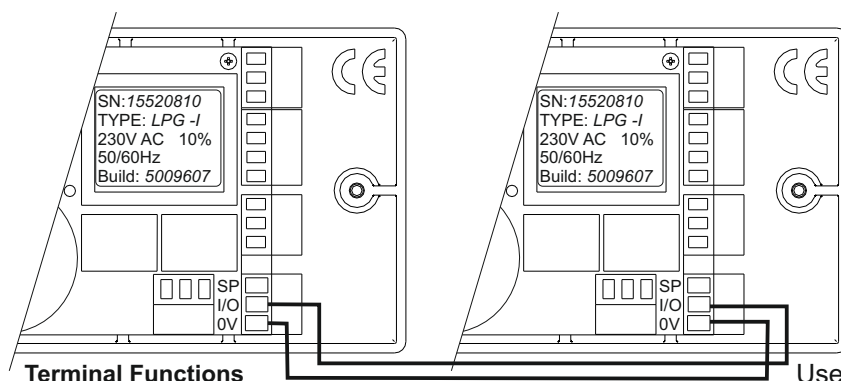

Do not tamper with this equipment to do so may risk electric shock or incorrect operation

Typical Operation

Example shows a TOC © Wired to a gas supply solenoid valve. The warning light is active in this example when the first alarm level is reached (10%) and the gas solenoid is de-activated when the second alarm level is reached (25%). Note in this example a surge suppressor is fitted to the gas solenoid to extend the life of the relay. For DC solenoids a diode could be fitted. Any such installation must comply with the national regulations in force in the country EN1775 refers

Link Function

Up to 8 Toc-10 © units can be linked together using the I/O and 0V terminals. When linked the Toc-10 © units have common alarm and common reset function.

Use minimum 0.75mmSQ Cable

Other Models Available

LPG Models

T10-LPG-12RP	Marine 12V DC Version with 2 Alarm Relays
T10-LPG-23	Basic LPG Version No Relay Outputs
T10-LPG-23R	Single Relay Version
T10-LPG-23R2W	Fitted With 3M UK Mains Lead and 2 Alarm Relays

Methane (Natural Gas) Models

T10-CH4-23	Basic CH4 Version No Relay Outputs
T10-CH4-23R	Single Relay Version
T10-CH4-23RP	Full Version With 2 Alarm Relays
T10-CH4-23R2W	Fitted With 2M UK Mains Lead and 2 Alarm Relays

Physical Details

Standard Specifications

Supply Voltage	230V AC 50/60Hz
Control Relay	1 Relay Changeover Contacts 4 A @ 230V AC
Interfacing	Up to 6 Units Interlinked For Network Operation
Protection Category	IP42
Insulation	Class II
Installation	Wall Mounting Twin Gang Patress Box
Environment of Application	Residential/Light Commercial
Operating Temperature	0 - 55 Deg C
Operating Humidity	0-90% RH Non Condensing
Types of Gas Detected	LPG, Butane, Propane (standard) Methane (option T10-CH4-23R)
Alarm Level	Warning 10%, Alarm 20% LEL
Sensor Warm up Time	Typically 1 Minute
Reference Standards	LVD EN 60335-1 EMC EN 50270 Gas Alarms EN 50194 Ingress Protection EN 60529

Alarm Indications

	Alarm Level 1 relay	Sounder	Power LED	Fault LED	Alarm LED
FOLLOW EMERGENCY ACTIONS					
Alarm 1 ~10% LEL		✓	☀		☀
Alarm 2 ~25% LEL	✓	✓	☀		☀
Normal			☀		
Fault			☀	☀	

No Power
LED

CALL FOR SERVICE

Note that the power LED will flash during warm up for 1 minute.

General Information

The TOC-10 © is pre-calibrated for its indicated target gas, usually LPG or Methane. The TOC-10 © will respond to any flammable gas to a greater or lesser degree. The following list indicates typical materials that may be commonly present which the unit may respond to in operation:

Aerosol Propellants (Butane)
Paint Solvents (VOC's)
Hot Cooking Oils
Nail Varnish
Solvent Based Adhesives (VOC's)

Some commonly occurring substances may cause long term detector damage, typically:

Silicones (furniture polishes)
Hair sprays (Silicones, VOC's etc)
Chlorinated Cleaning Agents
