

International Gas Detectors

# TOCSIN750 GSM OPTION

## Advanced Addressable 2-Wire Gas Detection System

The TOC-750 Series GSM Module uses the mobile phone network to add remote alarm and reporting features to the TOC-750 gas detection control panel. The module is fitted internal to the controller and supplied with a 3M aerial extension. A multinet M2M SIM is provided by IGD on an annual contract to ensure a reliable connection.

### EMAIL ALERTS
